

Best Use Guidelines for Online Activity

Moo Moo and 'Where does my milk come from?'

Thank you for downloading Cool Milk Scotland's **Moo Moo educational activity** for the children.

The activity can be linked to the **Early Years Curriculum for Excellence**; it is fun, educational and can be as interactive as you wish it to be by using the free downloadable resources (Farm Yard Picture, Colouring in Moo Moo) included within the links below.

You can pause the video during the pop-up pictures for each part of the activity; this allows you to give the children the opportunity to engage and talk about the pictures they see.

Draw them into a discussion about the picture and ask them to tell you more about them to help them learn.

At the end of the video, you can also download the free **Farm Yard Picture** and ask the children to pick out and name other animals and objects that they think Moo Moo may share her life with on the farm.

There is also a **downloadable Moo Moo** that the children can colour in and take home or put up on the wall as part of their Food and Farming Activity.

Don't forget that you can, if you wish, link this activity to the Curriculum for Excellence and share as a group activity or an individual learning experience in their learning journals!

Why not share your pictures and experience with us on our Facebook page at [@CoolMilkScot](#) ?
